# Manual De Migración De Mysql A Postgresql Laravel

## 1.2

The screenshot shows the DBeaver download page. It features two main sections: 'Community Edition 21.2.3' and 'Enterprise Edition 21.2'. The 'Community Edition' section includes release details (October 18, 2021), download links (Windows 64-bit installer and zip), and installation methods (Microsoft Store, Chocolatey). The 'Enterprise Edition' section includes release details (September 6, 2021), download links (Windows 64-bit installer and zip), and a list of supported NoSQL databases. At the bottom, there's a download progress bar for the Windows installer ('dbeaver-ce-21.2.3....exe') which is 0.5/101 MB and has 15 min left. A red arrow points from the text 'Paso 2) Instalación' to this download link.

## Paso PosgreSQL

### Paso 1) Descarga

### 1.1

A screenshot of the PostgreSQL download page, identical to the previous one but with a different section highlighted. On the left, there's a sidebar with 'enlaces rápidos' and a list of download options. The main area shows 'Descargas' with a sub-section for 'Descargas de PostgreSQL'. It explains that PostgreSQL is available as packages or installers for various platforms, including source code if desired. Below this, there's a section for selecting an operating system family with buttons for 'Linux', 'Mac OS', 'Ventanas' (Windows), and 'BSD'. The 'Ventanas' button is highlighted with a red box.

### Instaladores de Windows

#### Instalador interactivo de EDB

Descargue el instalador certificado por EDB para todas las versiones de PostgreSQL compatibles.

Este instalador incluye el servidor PostgreSQL, pgAdmin; una herramienta gráfica para administrar y desarrollar sus bases de datos y StackBuilder; un administrador de paquetes que se puede usar para descargar e instalar herramientas y controladores PostgreSQL adicionales. StackBuilder incluye administración, integración, migración, replicación, geoespacial, conectores y otras herramientas.

Este instalador puede ejecutarse en modo de instalación gráfica o silenciosa.

El instalador está diseñado para ser una forma sencilla y rápida de comenzar a ejecutar PostgreSQL en Windows.

Los usuarios avanzados también pueden descargar un archivo zip de los binarios, sin el instalador. Esta descarga está destinada a usuarios que deseen incluir PostgreSQL como parte de otro instalador de aplicaciones.

#### Sopporte de plataforma

Los instaladores son probados por EDB en las siguientes plataformas. Por lo general, se puede esperar que se ejecuten en otras versiones comparables:

Versión de PostgreSQL	Plataformas Windows de 64 bits	Plataformas Windows de 32 bits
13	2019, 2016	
12	2019, 2016, 2012 R2

## 1.5

The screenshot shows the EDB PostgreSQL download page. At the top, there's a navigation bar with links like 'Why EDB?', 'Products', 'Services', 'Support', 'Resources', 'Plans', 'Contact', 'Sign In', and 'Downloads'. The 'Downloads' link is highlighted with a red border. Below the navigation is a message box with the title 'Thank You For Downloading PostgreSQL' and the text 'Now that you have downloaded Postgres, get started using it' and 'If your download does not begin automatically, start the download now'. The main content area is titled 'PostgreSQL Tutorials, Resources and Training' and describes it as 'For Developers, DBAs, DevOps and IT Managers'. Below this, there's a section titled 'Helpful Resources' with several cards. One card for 'PostgreSQL 14.0.1-1...exe' is highlighted with a red box, showing a download progress bar at 85.280 MB Quedan 2 min.

## Crear proyecto Laravel

### 3) Pasos Para Crear un proyecto

A screenshot of a Windows Command Prompt window titled "C:\Windows\System32\cmd.exe". The title bar includes standard window controls. The command line shows the following text:

```
C:\> Microsoft Windows [Versión 10.0.19043.1288]
(c) Microsoft Corporation. Todos los derechos reservados.

C:\xampp\htdocs>laravel new inwos --jet
```

The command "laravel new inwos --jet" is highlighted with a red rectangular box.

# Manual De Migración De MySql A Postgresql Laravel

## Base de datos en Laravel

### 4) Crear Base de datos en Laravel

The screenshot shows a code editor interface with a sidebar labeled 'EXPLORADOR: INWOS' containing project files like 'app', 'bootstrap', 'database', 'factories', and 'migrations'. The 'migrations' folder is expanded, showing numerous migration files such as '2014\_10\_12\_000000\_create\_users\_table.php', '2014\_10\_12\_100000\_create\_password\_resets\_table.php', etc. A red box highlights this 'migrations' folder. The main panel displays the content of the selected file, '2014\_10\_12\_000000\_create\_users\_table.php', which contains PHP code for defining a 'users' table structure using the Illuminate\Database\Schema\Blueprint class.

```
<?php  
use Illuminate\Database\Migrations\Migration;  
use Illuminate\Database\Schema\Blueprint;  
use Illuminate\Support\Facades\Schema;  
  
class CreateUsersTable extends Migration  
{  
    /**  
     * Run the migrations.  
     *  
     * @return void  
     */  
    public function up()  
    {  
        Schema::create('users', function (Blueprint $table) {  
            $table->id();  
            $table->string('name');  
            $table->string('email')->unique();  
            $table->timestamp('email_verified_at')->nullable();  
            $table->string('password');  
            $table->rememberToken();  
            $table->foreignId('current_team_id')->nullable();  
            $table->string('profile_photo_path', 2048)->nullable();  
            $table->timestamps();  
        });  
    }  
  
    /**  
     * Reverse the migrations.  
     *  
     * @return void  
     */  
}
```

## Base en PostgreSQL

### 5) Crear Base en Postgres

## Configuraciones Para Migrate

### 6) Pasos de configuración

The screenshot shows a Laravel project structure in a code editor. The left sidebar shows files like bootstrap, config, database, migrations, seeders, .gitignore, public, resources, routes, storage, tests, vendor, .editorconfig, .env.example, .gitattributes, .gitignore, .styleci.yml, artisan, composer.json, composer.lock, package.json, phpunit.xml, README.md, server.php, tailwind.config.js, and webpack.mix.js. The right pane shows the '.env' file with the following content:

```
APP_NAME=Laravel
APP_ENV=local
APP_KEY=base64:FFZLQYQUPPYfAqzpsVUd3pE8ZT3Zmbn8T4y4Hpz1RUY=
APP_DEBUG=true
APP_URL=http://inwos.test

LOG_CHANNEL=stack
LOG_DEPRECATIONS_CHANNEL=null
LOG_LEVEL=debug

DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=inwos
DB_USERNAME=root
DB_PASSWORD=
```

A red box highlights the database connection configuration starting from 'DB\_CONNECTION=mysql'.

# Manual De Migración De Mysql A Postgresql Laravel

```
C:\>xampp>php>php.ini
1 [PHP]
2
3 ;;;;;;;;;;;;;;;;;;;
4 ; About php.ini ;
5 ;;;;;;;;;;;;;;;;;;;
6 ; PHP's initialization file, generally called php.ini, is responsible for
7 ; configuring many of the aspects of PHP's behavior.
8
9 ; PHP attempts to find and load this configuration from a number of locations.
10 ; The following is a summary of its search order:
11 ; 1. SAPI module specific location.
12 ; 2. The PHPRC environment variable. (As of PHP 5.2.0)
13 ; 3. A number of predefined registry keys on Windows (As of PHP 5.2.0)
14 ; 4. Current working directory (except CLI)
15 ; 5. The web server's directory (for SAPI modules), or directory of PHP
16 ; (otherwise in Windows)
17 ; 6. The directory from the --with-config-file-path compile time option, or the
18 ; Windows directory (usually C:\windows)
19 ; See the PHP docs for more specific information.
20 ; http://php.net/configuration.file
21
22 ; The syntax of the file is extremely simple. Whitespace and lines
23 ; beginning with a semicolon are silently ignored (as you probably guessed).
24 ; Section headers (e.g. [Foo]) are also silently ignored, even though
25 ; they might mean something in the future.
26
27 ; Directives following the section heading [PATH=/www/mysite] only
28 ; apply to PHP files in the /www/mysite directory. Directives
29 ; following the section heading [HOST=www.example.com] only apply to
30 ; PHP files served from www.example.com. Directives set in these
31 ; special sections cannot be overridden by user-defined INI files or
32 ; at runtime. Currently, [PATH=] and [HOST=] sections only work under
33 ; CGI/FastCGI.
```

## 7.6

# Manual De Migración De Mysql A Postgresql Laravel

## 7.7

The screenshot shows the Visual Studio Code interface with the file `php.ini` open. The code editor displays the PHP configuration file, specifically focusing on the `extension` section. A red box highlights the line `extension=pdo_pgsql`, which is being added to the configuration. The sidebar on the left shows the project structure for a Laravel application named `INWOS`.

```
C:\xampp>php > php.ini
916 extension=mbstring
917 extension=exif ; Must be after mbstring as
918 extension=mysqli
919 ;extension=oci8_12c ; Use with Oracle Database 12c Instant Client
920 ;extension=odbc
921 ;extension=openssl
922 ;extension=pdo_firebird
923 extension=pdo_mysql
924 ;extension=pdo_oci
925 ;extension=pdo_oci8
926 ;extension=pdo_pgsql
927 extension=pdo_sqlite
928 ;extension=pgsql
929 ;extension=shmop
930
931 ; The MIBS data available in the PHP distribution must be installed.
932 ; See http://www.php.net/manual/en/snmp.installation.php
933 ;extension=snmp
934
935 ;extension=soap
936 ;extension=sockets
937 ;extension=sodium
938 ;extension.sqlite3
939 ;extension=tidy
940 ;extension=xmlrpc
941 ;extension=xsl
942
943 ;;;;;;;;;;;
944 ; Module Settings ;
945 ;;;;;;;;;;;
946 asp_tags=Off
947 display_startup_errors=On
948 track_errors=Off
```

## 7.8

This screenshot shows the same Visual Studio Code setup as the previous one, but with more extensions highlighted in a red box. The line `extension=pdo_pgsql` is still present, but now `extension=pdo_sqlite` and `extension=pgsql` are also highlighted, indicating they are being added or configured together.

```
C:\xampp>php > php.ini
916 extension=mbstring
917 extension=exif ; Must be after mbstring as
918 extension=mysqli
919 ;extension=oci8_12c ; Use with Oracle Database 12c Instant Client
920 ;extension=odbc
921 ;extension=openssl
922 ;extension=pdo_firebird
923 extension=pdo_mysql
924 ;extension=pdo_oci
925 ;extension=pdo_oci8
926 extension=pdo_pgsql
927 extension=pdo_sqlite
928 extension=pgsql
929 ;extension=shmop
930
931 ; The MIBS data available in the PHP distribution must be installed.
932 ; See http://www.php.net/manual/en/snmp.installation.php
933 ;extension=snmp
934
935 ;extension=soap
936 ;extension=sockets
937 ;extension=sodium
938 ;extension.sqlite3
939 ;extension=tidy
940 ;extension=xmlrpc
941 ;extension=xsl
942
943 ;;;;;;;;;;;
944 ; Module Settings ;
945 ;;;;;;;;;;;
946 asp_tags=Off
947 display_startup_errors=On
948 track_errors=Off
```

## Pasos para la migración

# Manual De Migración De Mysql A Postgresql Laravel

## 8) Migración

### 8.1

A screenshot of Visual Studio Code showing the .env.example file open in the editor. The file contains environment variables for a Laravel application, including APP\_NAME=Laravel, APP\_ENV=local, APP\_KEY=, APP\_DEBUG=true, APP\_URL=http://localhost, LOG\_CHANNEL=stack, LOG\_DEPRECATIONS\_CHANNEL=null, LOG\_LEVEL=debug, DB\_CONNECTION=pgsql, DB\_HOST=127.0.0.1, DB\_PORT=5432, DB\_DATABASE=, DB\_USERNAME=postgres, DB\_PASSWORD=, BROADCAST\_DRIVER=log, CACHE\_DRIVER=file, FILESYSTEM\_DRIVER=local, QUEUE\_CONNECTION=sync, SESSION\_DRIVER=database, and SESSION\_LIFETIME=120. Below the editor is a terminal window showing the command 'php artisan serve' being run, with the output 'Starting Laravel development server: http://127.0.0.1:8000'. The bottom status bar indicates the file is .env.example, the line is 14, the column is 13, and the encoding is UTF-8. It also shows tabs for PROBLEMAS, SALIDA, TERMINAL, and CONSOLA DE DEPURACIÓN, and icons for Go Live, Linter: unsupported, Prettier, and other tools.

### 8.2

# Manual De Migración De Mysql A Postgresql Laravel

## 8.3

## 8.4

# Manual De Migración De MySql A Postgresql Laravel

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** Shows the project structure with files like `bootstrap`, `config`, `database`, `migrations`, and `seeders`. The `DatabaseSeeder.php` file is selected and highlighted with a red box.
- Code Editor:** Displays the `DatabaseSeeder.php` code. A red box highlights the line `// \App\Models\User::factory(10)->create();`.
- Terminal:** Shows the command line interface with the following output:

```
C:\xampp\htdocs\inwos\database\seeders>DatabaseSeeder.php
C:\xampp\htdocs\inwos\database\seeders>
PS C:\xampp\htdocs\inwos>
```
- Status Bar:** Shows the file path `C:\xampp\htdocs\inwos\database\seeders\DatabaseSeeder.php`, line `Lin. 1, col. 1`, and encoding `Espacios:4`.

8.5

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** Shows the project structure with files like `bootstrap`, `config`, `database`, `migrations`, and `seeders`. The `DatabaseSeeder.php` file is selected and highlighted with a red box.
- Code Editor:** Displays the `DatabaseSeeder.php` code. A red box highlights the line `\App\Models\User::factory(1000)->create();`.
- Terminal:** Shows the command line interface with the following output:

```
C:\xampp\htdocs\inwos\database\seeders>DatabaseSeeder.php
C:\xampp\htdocs\inwos\database\seeders>
PS C:\xampp\htdocs\inwos>
```
- Status Bar:** Shows the file path `C:\xampp\htdocs\inwos\database\seeders\DatabaseSeeder.php`, line `Lin. 16, col. 36`, and encoding `Espacios:4`.

8.6

# Manual De Migración De MySql A Postgresql Laravel

The screenshot shows the Visual Studio Code interface. On the left is the Explorer sidebar with project files like bootstrap, config, database, factories, migrations, and seeders. The main editor window shows the `DatabaseSeeder.php` file:

```
<?php  
namespace Database\\Seeders;  
use Illuminate\\Database\\Seeder;  
class DatabaseSeeder extends Seeder  
{  
    /**  
     * Seed the application's database.  
     *  
     * @return void  
     */  
    public function run()  
    {  
        \App\\Models\\User::factory(1000)->create();  
    }  
}
```

Below the editor is a terminal window with the following content:

```
Windows PowerShell  
Copyright (C) Microsoft Corporation. Todos los derechos reservados.  
Prueba la nueva tecnologia PowerShell multiplataforma https://aka.ms/pscore6  
PS C:\\xampp\\htdocs\\inwos> php artisan migrate:fresh --seed  
Líne: 16, col: 36 Espacios: 4 UTF-8 LF php ⚡ Go Live Idle: ready ⚡ Prettier ⚡ Q
```

8.7

The screenshot shows the Visual Studio Code interface. The Explorer sidebar and the `DatabaseSeeder.php` file content are identical to the previous screenshot.

The terminal window shows the output of the `artisan migrate:fresh --seed` command, with the migration logs highlighted by a red box:

```
Migrating: 2021_09_16_195453_create_orders_table (100.05ms)  
Migrating: 2021_09_16_195603_create_orders_confirmations_table (69.09ms)  
Migrating: 2021_09_16_195603_create_orders_confirmations_table (69.09ms)  
Migrating: 2021_10_30_033638_create_sessions_table (250.02ms)  
Migrating: 2021_10_30_033638_create_sessions_table (250.02ms)  
Database seeding completed successfully.  
PS C:\\xampp\\htdocs\\inwos>
```
